### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas Cole on 4/6/05.

The application has been amended as follows:

#### **In The Specification**

In the amendment to the specification filed on 3/4/05, line 6 of the amended paragraph, "in an active state." has been changed to --in an inactive state.--.

#### **In The Claims**

Claim 1, line 5, "active" has been changed to --inactive--.

Claim 1, line 10, "states;" has been changed to --state;--.

#### **Reasons For The Above Changes**

The above changes have been made to correct the minor informalities in the specification and in the claims according to the Ex Parte Quayle Action on 1/4/05.

### **REASONS FOR ALLOWANCE**

2. Claims 1-6 are allowed.

Claim 1 is allowed because the prior art of record fails to disclose a constant-voltage circuit including a constant-current portion; a reference voltage portion; and an output portion

Art Unit: 2816

with the recited connections and operations set forth therein. In particularly, the prior art of record fails to disclose or suggest the constant-voltage circuit including the reference voltage portion for outputting a first reference voltage in response to the first control signal while the start signal is in the inactive state and for outputting a second reference voltage higher than the first reference voltage in response to the first control signal while the start signal is in the active state; and the output portion for outputting a constant internal voltage in response to the second control signal.

Claims 2-6 are allowed because they depend on claim 1.
